LEAN is a process Owners are bringing to their construction projects to drive out many types of waste that have historically plagued projects.

For public projects, which have more restrictions, or private ones, starting the LEAN process may seem daunting for Owners, as well as design, engineering and construction professionals.

These experienced LEAN users can guide you through the process, by sharing successful approaches, and lessons learned, including Owner presentations about their first LEAN projects. Whether you want to start gradually, or jump in with both feet, let them show you how it's done.

This course includes presentations by instructors and owners, interactive exercises, and a panel discussion. Featured projects include the California Lottery Building and the Cordis West Coast Consolidation.

To prepare you for the course, you will receive some “Points to Ponder” when you submit your registration.

Who would benefit from this course:

Owners, Architects/Designers, Construction Managers, Engineers, Contractors, Subcontractors, and more.

INSTRUCTORS:

George Zettel is Manager of Lean Construction, working for Turner Construction since 2003. He is currently on the Core Team for an Integrated Project Delivery team designing and building the 140 bed UHS Temecula Valley Hospital in Temecula, CA, and also helps Turner's project teams with improvement projects throughout the Southwest. George is on AGC's Lean Construction Steering Committee, and the National Board of Directors for the Lean Construction Institute. George has 28 years of industry experience including roles in the building trades, construction supervision, project management, and as a facility owner.

Jim Kordakis is a Senior Project Manager for Roebbelen Contracting, Inc. He has 27 years of industry experience predominantly in K-12 education and public works. Jim is a member of the Lean Construction Institute and has implemented Lean during Pre-construction on a dozen Public Works projects, most notably the Fairmont Middle School Project in Vacaville, on which Jim presented at the Lean Congress in Boulder, Colorado.

Additional Owner team presentations will be included.

Complete Form and submit as directed below.
